

SAGAR MAHARANA

Pune, Maharashtra | +91 63717 38835 | maharanasagar095@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

SUMMARY

Results-driven professional with hands-on experience in SQL, Excel, Python, Tableau, and machine learning. Skilled in cleaning, transforming, and modeling complex datasets to generate actionable insights. Proficient in building interactive dashboards, KPI reporting, and developing predictive models using Pandas, NumPy, and Scikit-learn. Adept at translating data into meaningful business outcomes and effectively communicating insights to cross-functional stakeholders. Experienced in handling both structured and unstructured data across end-to-end workflows.

TECHNICAL SKILLS

- **Languages & Databases:** SQL (MySQL: Joins, CTEs, Subqueries, Window Functions), Python
- **Python Libraries:** Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, Statsmodels
- **BI & Reporting:** Power BI (Power Query, DAX), Excel (Pivot Tables, Lookups), KPI Dashboards
- **Analytics:** Data Cleaning & Validation, Funnel Analysis, Trend Analysis, Root Cause Analysis, Sentiment Analysis, Statistical Modeling

PROJECTS

Swiggy Bangalore: Order Drop Root Cause Analysis / SQL, Python, Statsmodels, Power BI

- Built an end-to-end root cause analysis on a simulated 57K-order Bangalore food-delivery dataset using Python and SQL, with automated data cleaning and validation checks.
- Attributed a 40% weekly order drop to 5 causes (rider shortage 40%, demand dip 37%, UPI failures 23%) via waterfall analysis; validated with chi-square and t-tests ($p < 0.001$).
- Designed a 3-page Power BI dashboard and sized fixes projected to recover 1,470 orders (₹4.4 lakh GMV) per week under stated assumptions.

Blinkit Grocery Delivery & Sales Insights / MySQL, Power BI, Data Modeling /

- Designed a relational schema and wrote MySQL queries (multi-table JOINS, window functions) to quantify sales trends and item-visibility impact [add X% finding].
- Built a Power BI dashboard tracking revenue, average order value, outlet-tier performance, and fatcontent sales to support business decisions.

Indian Digital Life Friction Analysis / Python, Pandas, SQL, NLP /

- Classified ~4,400 reviews across 7 digital platforms into 8+ issue categories (payment failures, OTP, refunds, crashes, support) using a regex-based classifier in Python.
- Combined SQL and sentiment analysis to isolate root causes; [top category] accounted for [X%] of complaints.

Staccato Cafe Sales Automation & Analysis / Python, SQL, Power BI /

- Developed an automated data pipeline to collect, parse, and synchronize operational sales and order records from web systems, eliminating repetitive manual data tracking.

- Wrote Python automation scripts and intermediate SQL queries (JOINS, CTEs, aggregation functions) to clean raw transactional logs and calculate daily revenue, order velocity, and peakhour operational trends.
- Built diagnostic dashboards and automated reporting workflows to track business KPIs, identifying workflow bottlenecks and improving report turnaround efficiency.

EDUCATION

Master of Computer Applications (MCA), Biju Patnaik University of Technology (BPUT), 2026 | CGPA: 8.54/10

Bachelor's in Mathematics, Berhampur University, 2024

CERTIFICATIONS

INTERNSHIP EXPERIENCE :

Data Science Intern | Enrivers Pvt. Ltd. Aug 2025 – Nov 2025

- Completed a 3-month hands-on internship focusing on data science methodologies, data handling, and analytics.
- Performed data preprocessing, exploratory analysis, and applied analytical techniques to derive actionable insights.

CERTIFICATIONS & TRAINING :

- Exploratory Data Analysis – FutureSkills Prime (MeitY & NASSCOM) | Jul 2026
- Data Analytics Job Simulation – Deloitte (via Forage) | Jan 2026
- Completed practical simulations in data analysis and forensic technology.
- Data Science & Analytics – HP LIFE Foundation | Jul 2026
